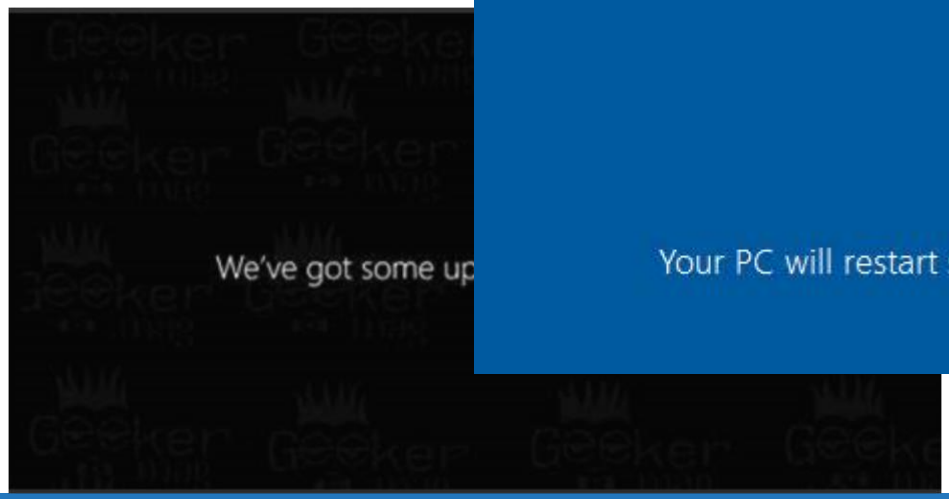
IN WINDOWS 10 19H2

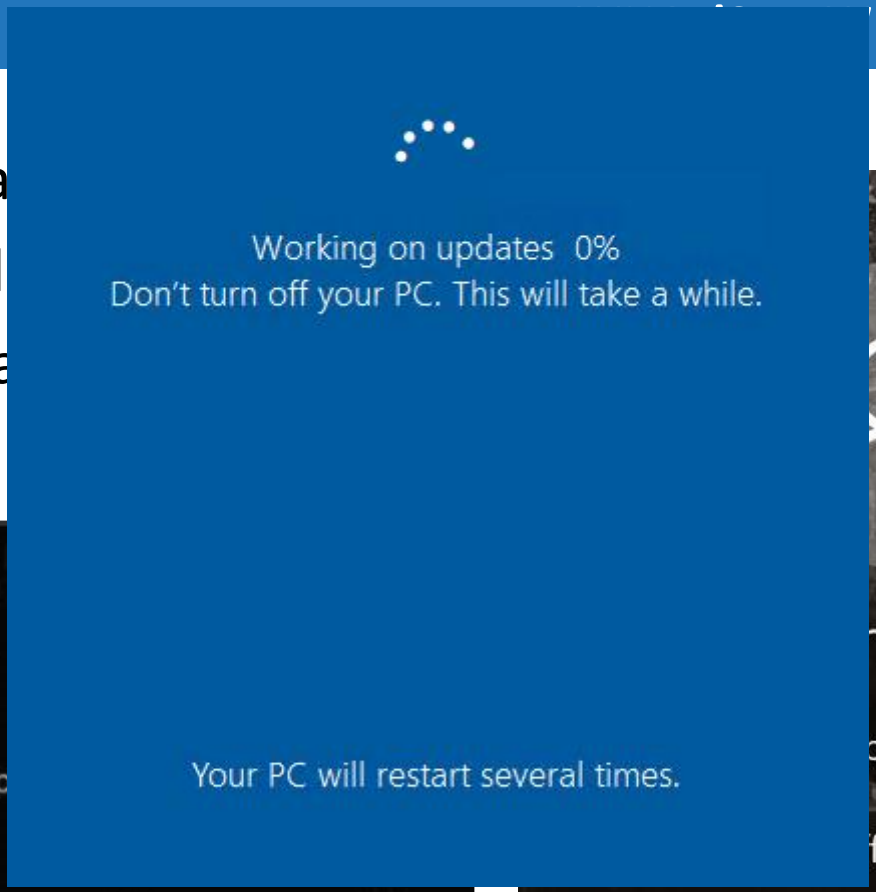
Up to 19H1 (aka

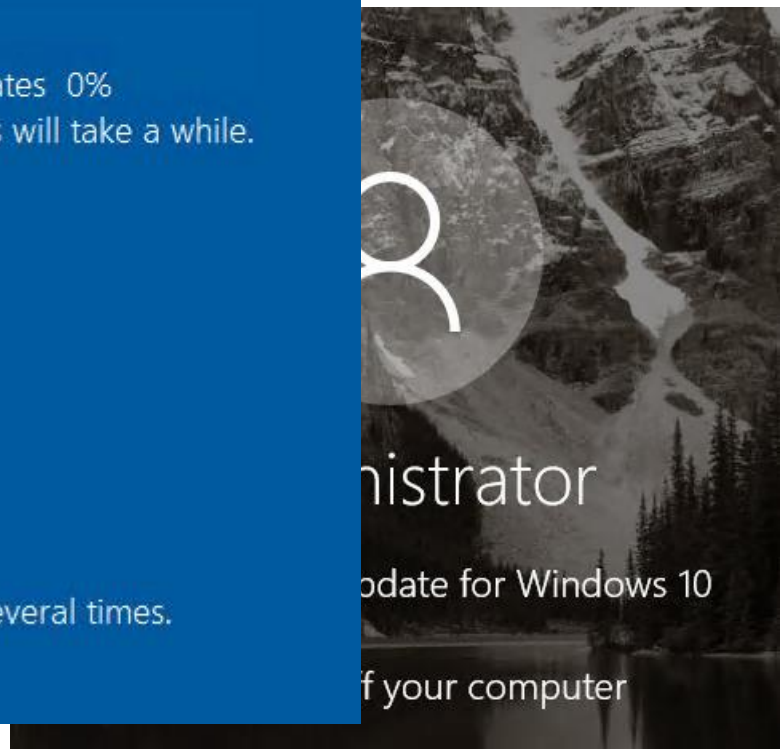
Every new build

A new ISO availa

A new SDK avail







From 19H2 (1909 - 10.0.18362.1000)

a new update strategy is applied

The H2 release is not an OS-upgrade, just an LCU

An ISO will be avaialble to install 1909 from scratch

No new SDK for Developers

New Features will not be 'enabled by default' they will be enabled with an 'extra update'

(except for insider builds)

FollowingH1 releases will be OS-Upgrades like before

Reason? Limit user impact for ugrades

Upgrades are targeted to become 'just a reboot'

So What's new? Not
